

SHRABANA GOSWAMI

Frontend Engineer | React • Next.js • TypeScript

shrabanagoswami8@gmail.com | +91 98305 64513 | Kolkata, WB | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

ReactJS Developer with ~4 years of experience building responsive, high-performance, cross-browser web applications in React, TypeScript, and Next.js. Strong in reusable component libraries and design systems, performance optimization (90+ Lighthouse, Core Web Vitals), REST API integration, and React architecture (hooks, lifecycle, Context). Writes clean, maintainable, scalable code and collaborates closely with UI/UX designers, backend engineers, and product managers in Agile teams; mentors juniors through code reviews.

SKILLS

Languages — TypeScript, JavaScript (ES6+), HTML5, CSS3, Python(fundamental)

React & Frameworks — ReactJS (Hooks, Context API, component lifecycle, Suspense), Next.js (SSR/SSG, App Router), Redux Toolkit, Material UI

UI & Components — Reusable Component Libraries, Design Systems, Tailwind CSS, Responsive & Mobile-first Design, Cross-browser Compatibility, Figma-to-code

Performance — Core Web Vitals (LCP / INP / CLS), Lighthouse (90+), Lazy Loading, Memoization, Code Splitting

API & Async — REST API Integration, Asynchronous Programming, WebSockets (Socket.io), JWT / OAuth 2.0

Testing & Quality — Jest, React Testing Library, ESLint, Prettier, Code Reviews, Debugging

Version Control & Tooling — Git (branching, PRs, code reviews), Vite, Webpack, CI/CD (GitHub Actions)

Accessibility — WCAG / ARIA

Cloud & Backend — AWS (S3, EC2, IAM, Amplify), Vercel, Supabase, Node.js, Express.js, MongoDB

AI-assisted Development — GitHub Copilot, Claude AI

EXPERIENCE

Freelance Frontend Work

Feb 2025 – Nov 2025

Frontend Engineer (Sole Frontend Engineer — performance optimization, portal enhancement)

- Defined front-end architecture using Next.js server-side rendering (SSR) and code splitting in a component-based, TypeScript-first codebase, reducing initial load time by 25–30%.
- Engineered high-performance, responsive, cross-browser UIs with React.js, CSS3, and Tailwind CSS across 5+ device breakpoints, ensuring UI stability and design consistency.
- Improved Core Web Vitals and SEO via image optimization and lazy loading, achieving Lighthouse performance scores above 90 through rigorous benchmarking and performance debugging.
- Advocated for accessibility-first development and conducted code reviews to ensure WCAG compliance, increasing accessibility scores by 85%.
- Shipped a real-time notification system using WebSockets (Socket.io) for a social engagement platform with React.js, Webpack, and Redux, boosting user engagement by 20%.

Transition Period (Nov 2025 – Present) — Upskilling in Next.js App Router, full-stack development, and Python/AI fundamentals. Available for immediate joining.

Freelance & Contract Work

Jun 2023 – Oct 2024

Software Engineer — Advanced Structures India | Full Stack Developer | Frontend Developer — TIF Labs

- Crafted 15+ reusable React components and maintainable component library and design systems, utilizing high-level abstraction to reduce code duplication by ~30% following coding standards and object-oriented design.
- Centralized state management with Redux and Context API across 6+ modules and refactored 5+ RESTful API integrations, improving frontend predictability and load performance.
- Delivered a full-stack course management platform (MongoDB, Express.js, Next.js, Node.js) with JWT/OAuth 2.0 authentication, streamlining enrollment by 15%.
- Developed a React and TypeScript workflow generator UI enabling end-to-end process automation with up to 8 configurable steps, reducing manual setup time by ~3 hours per workflow.

Aeonix Research & Innovations LLP

Dec 2021 – May 2023

Frontend Engineer (promoted from Frontend Developer Intern within 6 months)

- Owned a ~15,000-line React/TypeScript codebase with Context API, ensuring seamless integration via Git-based workflows and code reviews.
- Enforced code quality through unit and component testing with Jest and React Testing Library, maintaining 65%+ code coverage.
- Enhanced React components with lazy loading and memoization, improving UI performance by 40% for data-heavy, data-visualization dashboards.
- Collaborated across 3 cross-functional teams in an Agile/Scrum environment to ship 10+ features on schedule, mentoring 2 junior engineers.

EDUCATION

- **Bachelor of Technology | Information Technology | University of Calcutta**
- **Bachelor of Science | Computer Science | University of Calcutta**

Sep 2019 - Jun 2022

Jun 2015 - Jul 2019
